

Amendments to the Claims:

Please amend the claims to read, as follows:

1. (currently amended) A Web access providing system comprising Web connecting means for, if more than one call is provided in one communication channel based on multiple access technology, in response to a call from a calling subscriber terminal to a called subscriber terminal, sending a Uniform Resource Locator (URL) to connect the call to a Web page associated with said called subscriber terminal, said Uniform Resource Locator (URL) being associated with [[the]] a called subscriber number including the telephone numbers and mail address pre-registered in said called subscriber terminal and being stored in said called subscriber terminal, whereby said system allows said calling subscriber terminal to access said Web page, and

authentication means for performing authentication of the subscriber number of said calling subscriber terminal in response to said call, wherein said Web connecting means connects said call to said Web page associated with said called subscriber terminal depending on the result of said authentication by said authentication means, and the authentication by said authentication means verifies that the subscriber number of said calling subscriber terminal is contained in a subscriber number list associated with said called subscriber terminal.

2-3. (canceled)

4. (currently amended) The Web access providing system according to claim ~~[[3]]~~ 1, wherein said subscriber number list is a telephone directory stored in said called subscriber terminal.

5. (currently amended) ~~[[Web]]~~ The web access providing system according to claim ~~[[3 or]]~~ 4, wherein said authentication is performed in said called subscriber terminal.

6-7. (canceled)
